PERSONAL STATEMENT

I'm a recent graduate of Turing School of Software and Design with a certificate of Web Application Development with Ruby, Rails and JavaScript. I am looking for an apprentice or junior developer position.

I love systems and communication, and I have unending enthusiasm for computer science and its potential to help people work together in new ways. I am passionate about the quality of the code I write, the way I collaborate with my team, and the quality of service I provide to clients—and I'm looking to join a team with the same values. I'm excited to grow with a team building valuable products and writing code that really matters to people.

WORK EXPERIENCE

PixElement, Columbus, Ohio

August 2016 - June 2017

Developed volumetric measurement tools that allow customers to interface with photogrammetry data using digital maps.

Python, Javascript, UI Design, AWS

EDUCATION

Turing School of Software & Design, Denver, CO

July 2015 - January 2016

RubySteps "Woot" Camp, Online

December 2014

I am a lifelong learner. I spent my school years as a self directed homeschooler and attending Sudbury model democratic schools.

SKILLS & TECHNOLOGIES

Ruby & Rails

Selenium, TDD

Javascript & jQuery

Postgres, SQL

HTML & CSS

Bash scripting, Unix

Git version control

CURRENT PROJECTS

Lojbo, a Lojban dictionary with an emphasis on user-friendliness and style. Ruby on Rails
