PERSONAL STATEMENT

I'm a junior software developer who loves systems and communication, and has enthusiasm for computer science and its potential to help people work together in new ways. I'm passionate about code quality, team collaboration, and providing value. I'm excited to grow with a team that has the same values, and write code that really matters.

WORK

PixElement, Columbus, OH

August 2016 - June 2017

Developed volumetric measurement tools that allow customers to interface with photogrammetry data using digital maps and Leaflet.

Javascript, Python, UI Design, AWS

EDUCATION

Turing School, Denver, CO

July 2015 - January 2016

Certificate of Web Application Development with Ruby, Rails and Javascript

Rubysteps "Woot" Camp, Online

December 2014

I'm a lifelong learner. I spent my school years as a self-directed homeschooler and attending Sudbury model democratic schools.
